

## Life of Ramu and His Family @ City .

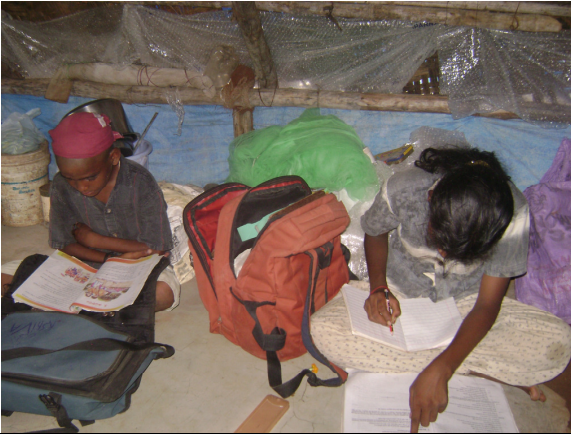

Ramu came to city along with his wife and children to live. In spite of vigorous hunt for a job, he could not get any job, He made a small hut and started living in it, Finally he joined as a daily wage laborer, some times his wife Manikyam too joins the work.

He was earning Rs 100 a day which is hardly sufficient to keep them from starving

His daughter Krishnaveni studying 7<sup>th</sup> class, son was studying 5<sup>th</sup> class. Krishnaveni wants to become a medical doctor, while Shiva wants to become a police inspector

They try to complete their reading while the day light is on,

because in the night they don't have light. But during the exams time they were compelled to read in night time , But in kerosene lamp which emanates more pollution than light.

Even getting the kerosene is big deal, Kerosene is not only expensive but also scarcely available

When they heard of solar lantern, which works on sun light and gives light in the night for 4 hours, but when they heard about the price , they were disappointed because it is expensive , beyond their reach .

Story is still to be continued ..... Probably with your donation it will be completed ....

If you can send a donation we can provide them with one solar lantern. This could give a bright future to to Krishnaveni and Shiva.
